.Net Front End Developer
Job Description

Role:	Develop and maintain customer facing websites and the processes that support them.
Location:	Redhill, Surrey
Brand:	Yellow Jersey Bicycle Insurance
Reporting to:	IT Director
Contract type:	Permanent
Hours:	Full time (Monday to Friday – 8.55am to 5.30pm)

The role

Yellow Jersey is a busy e-commerce website selling cycling insurance products, and we want you to take over the helm. The vast majority of our business comes via our website and therefore it's our most important tool

Our long serving front end developer, who's been responsible for the development and maintenance of our successful website, is moving on to pastures new and we're looking to find his successor. You'll be inheriting an AngularJS/MVC e-commerce system running in Azure with a WCF backend, and we'll need you to hit the ground running from day one. Once you're up to speed there's a number of exciting projects waiting to go, which will really give you the opportunity to make your mark. This isn't a role where you'll be spending all your time fixing someone else's code!

You'll be part of a friendly and supportive development team, but we'll be looking to you to be our go-to person for all things front end related. Both as a team, and as a company we're very open to new ideas and technologies and want to provide you with what you need to give our customers the experience they deserve, and expect.

Essential Skills

- HTML/CSS
- Javascript/JQuery
- AngularJS
- Asp.Net
- MVC.Net
- C# and VB.Net
- Ability to communicate with colleagues at all levels of seniority and liaise effectively with other internal departments
- Good team working skills and ability to work with minimal supervision
- Good problem solving abilities

Preferred Skills

- WCF/SOAP
- Knowledge of .Net, Visual Studio and testing frameworks
- Experience of GIT/GITHUB
- Understanding of OOP principles
- TDD
- Knowledge of design patterns
- User design experience
- PHP
- Wordpress
- SQL Server
- Azure Webapps
- Azure SQL

Main Duties and Responsibilities:

- Work on customer facing websites.
- Consult with internal clients about business requirements.
- Build applications to internal client specifications.
- Customise current applications in line with changing business needs.
- Evaluate performance of applications.
- Test and implement system updates.
- Design, build and maintain efficient, reusable and reliable code.
- Identify bottlenecks and bugs and devise solutions to address these issues.
- Help maintain code quality and organisation.
- Demonstrate a positive, enthusiastic, committed and flexible attitude towards other team members, recognising the importance and benefits of effective team working.
- Maintain a good level of personal presentation.
- Comply with the Data Protection Act at all times.
- Actively follow company policies (including Health & Safety and Equal Opportunities)
- Attend team and staff meetings as and when required.
- Carry out any other duties within the scope, spirit and purpose of the job as requested by your manager.

About us

The Plan Group Ltd is a family owned, independent insurance intermediary delivering high-quality cover from market-leading insurers in niche commercial and personal lines insurance. We are listed in the UK's top 100 brokers, employ over 100 staff and write in excess of £25m Gross Written Premium. The business is built on long-term staff, customer and insurer relations. We pride ourselves on product and IT innovations to help drive growth.

Yellow Jersey is our innovative, #insurtech start-up, launched in 2014 to meet the insurance needs of cyclists and cycling related businesses. Despite its young age, Yellow Jersey is firmly established as a go to brand in these fast growing markets. Cyclists want to maximise the time spent on their bikes. The team passionately deliver on the brand promise, "Free Your Ride." They do so by making cycle insurance as easy and stress-free as possible.
